SUMMARY

Experienced Front-End Developer proficient in React JS, Redux Toolkit, and TypeScript, with a strong focus on building responsive and high-performance user interfaces. Passionate about writing clean, maintainable code and ensuring quality delivery with extreme attention to detail. Skilled in translating designs into seamless user experiences while staying up to date with modern web technologies. Dedicated to continuous learning, optimization, and sharing knowledge with the developer community.

SKILLS

JavaScript, React, Redux Toolkit, TypeScript, HTML5, CSS3, Tailwind, Bootstrap, Sass, OOP, Git, C++, Package Managers, Figma, Responsive Web Design, RESTful APIs & Fetching Data

Teamwork, Problem-solving, Creativity, Adaptability

WORK EXPERIENCE

Web Masters, Cairo | Frontend Intern

Nov 2024 – Feb 2025

- Gained hands-on experience in front-end development, working with technologies like React, Redux Toolkit, and TypeScript. Developed various projects during training, including a weather app, an e-commerce app, and other design-focused websites aimed at improving user experience.

CodeAlpha, India | Frontend Intern

June 2024 – Sept 2024

- Been trained and gained experience in front-end development, working with technologies like React and Redux. Built several projects during training, including an audio playlist app called Islamiyat, a to-do list, an age calculator, and other design-focused websites aimed at enhancing user experience.

SOME SIDE PROJECTS

GradGuide

- GradGuide is a graduation project, a web platform that leverages AI to streamline academic paper review through plagiarism detection, summarization, and grammar

checking. It helps researchers and reviewers enhance paper quality and accelerate the evaluation process while addressing issues like summarizing long research papers, linguistic errors, and content similarity. The platform provides intelligent review, real-time feedback, and training to improve researchers' skills. **(In progress)**

islamiyaat

- Islamiyaat is a web platform that provides access to all Quranic surahs recited by various scholars in different Qira'at. It also includes a collection of supplications, Islamic chants (Tawasheeh), and authentic Hadiths. The platform aims to offer a smooth and enriching experience for users looking to explore and listen to the Quran in various recitations while accessing spiritual content to strengthen their faith and knowledge.

E-commerce App

- The e-commerce website provides a seamless shopping experience, allowing users to browse products with images and prices and view detailed product information. It includes a shopping cart for adding items before purchase and supports user registration and login for a personalized experience. Additionally, it offers add-to-cart and wishlist features, enabling users to save products for later, ensuring a convenient and efficient shopping journey.

progameer

- The ProGamer website offers a seamless gaming experience, allowing users to browse a collection of games with images and details. It includes a game details page providing in-depth information about each title. The platform supports user registration and login for a personalized experience. Additionally, it features a favorites section where users can save their preferred games, ensuring an engaging and convenient browsing experience.

(The [portfolio](#) includes more projects that showcase my skills and experience in web development.)

VOLUNTEERING

Ex-Fresher, Maadi, Egypt | Team Leader & Instructor

2023 – 2025

- As an instructor, developing and delivering courses in Frontend Development and React.
- Leading and delivering courses and workshops in front-end development, focusing on knowledge sharing, skill enhancement, and equipping students with practical skills to successfully launch their careers.

EDUCATION

Bachelor Of Science in Computer Science | 2021-2025

Modern Academy, Maadi, Cairo
